

AMENDMENTS TO THE CLAIMS

Amendments to the claims are reflected below in the **Listing of Claims**, which replaces all prior versions, and listings, of claims in this application.

Listing of Claims

1. (Currently Amended) A method comprising:
parsing a message received by a first communication device to extract an incomplete addressing datum, wherein the message is received from a second communication device; and
an analyzing logic searching for ~~at least one clue~~ data from the parsed message, other than the incomplete addressing datum, to ~~complete~~ assist in completing the incomplete addressing datum.
2. (Original) The method of claim 1, wherein the incomplete addressing datum is a partial phone number.
3. (Original) The method of claim 1, wherein the incomplete addressing datum is a partial email address.
4. (Currently Amended) The method of claim 1, wherein the analyzing logic is incorporated into the first communication device or resides on a server.
5. (Currently Amended) The method of claim 1, wherein a directory searched by the analyzing logic is incorporated into the first communication device or resides on a server.
6. (Currently Amended) The method of claim 1, wherein the first communication device is to receive the message from the second communication device via a wireless communication.
7. (Currently Amended) The method of claim 1, wherein the ~~at least one clue~~ data includes at least one of a sender's company name, a recipient's company

name, a sender's email address, a recipient's email address, or a name found near the incomplete addressing datum in the parsed message.

8. (Currently Amended) A machine-readable medium that provides instructions which, when executed by a machine, cause the machine to perform operations comprising:

parsing a message received by a first communication device to extract an incomplete addressing datum, wherein the message is received from a second communication device; and

an analyzing logic searching for ~~at least one clue~~ data from the parsed message, other than the incomplete addressing datum, to ~~complete~~ assist in completing the incomplete addressing datum.

9. (Original) The machine-readable medium of claim 8, wherein the incomplete addressing datum is a partial phone number.

10. (Original) The machine-readable medium of claim 8, wherein the incomplete addressing datum is a partial email address.

11. (Currently Amended) The machine-readable medium of claim 8, wherein the analyzing logic is incorporated into the first communication device or resides on a server.

12. (Currently Amended) The machine-readable medium of claim 8, wherein a directory searched by the analyzing logic is incorporated into the first communication device or resides on a server.

13. (Currently Amended) The machine-readable medium of claim 8, wherein the first communication device is to receive the message from a second communication device via a wireless communication.

14. (Currently Amended) The machine-readable medium of claim 8, wherein the ~~at least one clue~~ data includes at least one of a sender's company name, a recipient's company name, a sender's email address, a recipient's email address, or a name found near the incomplete addressing datum in the parsed message.

15. (Currently Amended) An apparatus comprising:

a parser to parse a message received by a first communication device to extract an incomplete addressing datum, wherein the message is received from a second communication device; and

an analyzing logic to search for ~~at least one clue~~ data from the parsed message, other than the incomplete addressing datum, to ~~complete~~ assist in completing the incomplete addressing datum.

16. (Original) The apparatus of claim 15, wherein the incomplete addressing datum is a partial phone number.

17. (Original) The apparatus of claim 15, wherein the incomplete addressing datum is a partial email address.

18. (Currently Amended) The apparatus of claim 15, wherein the analyzing logic is incorporated into the first communication device or resides on a server.

19. (Currently Amended) The apparatus of claim 15, wherein a directory searched by the analyzing logic is incorporated into the first communication device or resides on a server.

20. (Currently Amended) The apparatus of claim 15, wherein the first communication device is to receive the message from the second communication device via a wireless communication.

21. (Currently Amended) The apparatus of claim 15, wherein the ~~at least one clue~~ data includes at least one of a sender's company name, a recipient's company name, a sender's email address, a recipient's email address, or a name found near the incomplete addressing datum in the parsed message.
